

# Industrial Tests, Inc.

## *"The Casino Maintenance People"*

We provide the expertise, tools and resources to help you, our customers manage the life cycle of your electric power distribution systems. We collect and process information obtained from individual systems and equipment to develop custom-tailored maintenance and life extension programs. We are an independent electrical testing, maintenance and full-service engineering services company. We function as an unbiased testing authority, professionally independent of manufacturers, suppliers and installers of equipment. We specialize in commercial buildings, including Casinos, although we have the expertise for any power distribution application. We provide 24 hour-365 day service, both on a planned and an emergency basis .

We are well equipped with modern equipment and can perform testing on the following:

- Generators
- Transformers
- Automatic Transfer Switch (ATS)
- Low Voltage Breakers
- Current Transformers
- Protective Relays
- MV Vacuum Switchgear
- Bus Duct
- Power Monitoring
- PLC controls
- Motor Control Centers

We have been serving our customers since 1976, over 30 years. We provide our customers with a professional team of degreed engineers, and certified technicians who are trained and experienced in performing specification and maintenance testing in compliance with industry standards. We have grown to be one of the largest independent electrical testing, maintenance, and engineering companies in Northern California. We utilize the latest generation of test and diagnostic equipment.

4021 Alvis Court, Suite 1  
Rocklin, CA 95677
