

## Industrial Tests, Inc.

*"The Commerical Building People"*

### Electrical Maintenance

We overstaff our crews to minimize your shutdowns and get the job done as efficiently as possible. We plan our jobs well in advance and make outages easy for you and your tenants.

### Circuit Breaker Testing

We bring our state of the art high current test equipment to site along with portable generators to fully function test circuit breakers 100Amp and greater.

### Spare Parts

Having spare parts is critical to any planned outage. We will work with you to identify and order fuses, circuit breakers, overloads and any other critical electrical components you need.

### MCC Inspection and Test

Motor Control Centers feed critical chiller and fan motors and are often ignored. We inspect and test the motor overloads and upstream breakers.
