

MAINTENANCE SHIELD™

Offered Exclusively by Industrial Tests, Inc.

ELECTRICAL MAINTENANCE CONTRACTS

Why Preventative Maintenance?

Your electrical system and equipment require periodic checks and testing to help ensure they're operating safely and efficiently. We offer a range of plans to help you maintain, protect, and prolong your plants power system. With a Maintenance Shield™ Contract, your company is assigned a Field Service Engineer or Technician who works directly with you. Our specialist will develop a customized electrical maintenance program specifically tailored to your schedule and needs. This contract will include the analysis of testing results, training, consultation, and technical support that is necessary for you to maintain a safe facility, while simultaneously reducing your economic vulnerabilities associated with unplanned electrical faults.

Maintenance Shield™ Services Include:

- Transformers
- Bushings
- Breakers
- Switchgear
- Protective Relays
- Capacitors
- HV Switch Alignment
- Reactors
- Voltage Regulators
- Motor
- Unit Substations
- Rotating Equipment
- And More...

The expert Engineers and Technicians at Industrial Tests, Inc. will allow you to be confident in your electrical delivery system.

Our consulting, testing, operating and maintenance services will make sure that all of your electrical assets will have the best care and service in the industry.
