

Industrial Tests, Inc.

"Supplier of Electrical Parts & Service"

We provide the expertise, tools, and resources to help you manage the life cycle of your electric power distribution systems. We collect and process information obtained from individual systems and equipment to develop custom-tailored maintenance and life extension programs. We are an electrical testing, maintenance, and full-service engineering services company. We function as an unbiased testing authority-professionally independent of manufacturers, suppliers, and installers of equipment.

Electrical Spare Parts are a necessary part of any planned outage. Our highly trained team is uniquely qualified to help you identify what parts you need before the outage takes place. The key to a successful maintenance outage is being prepared for all eventualities - blown fuse, failed breaker or a weak overload. Take advantage of our offer and we will send you a free quote for recommended spare parts.
